HEALTH INFO:

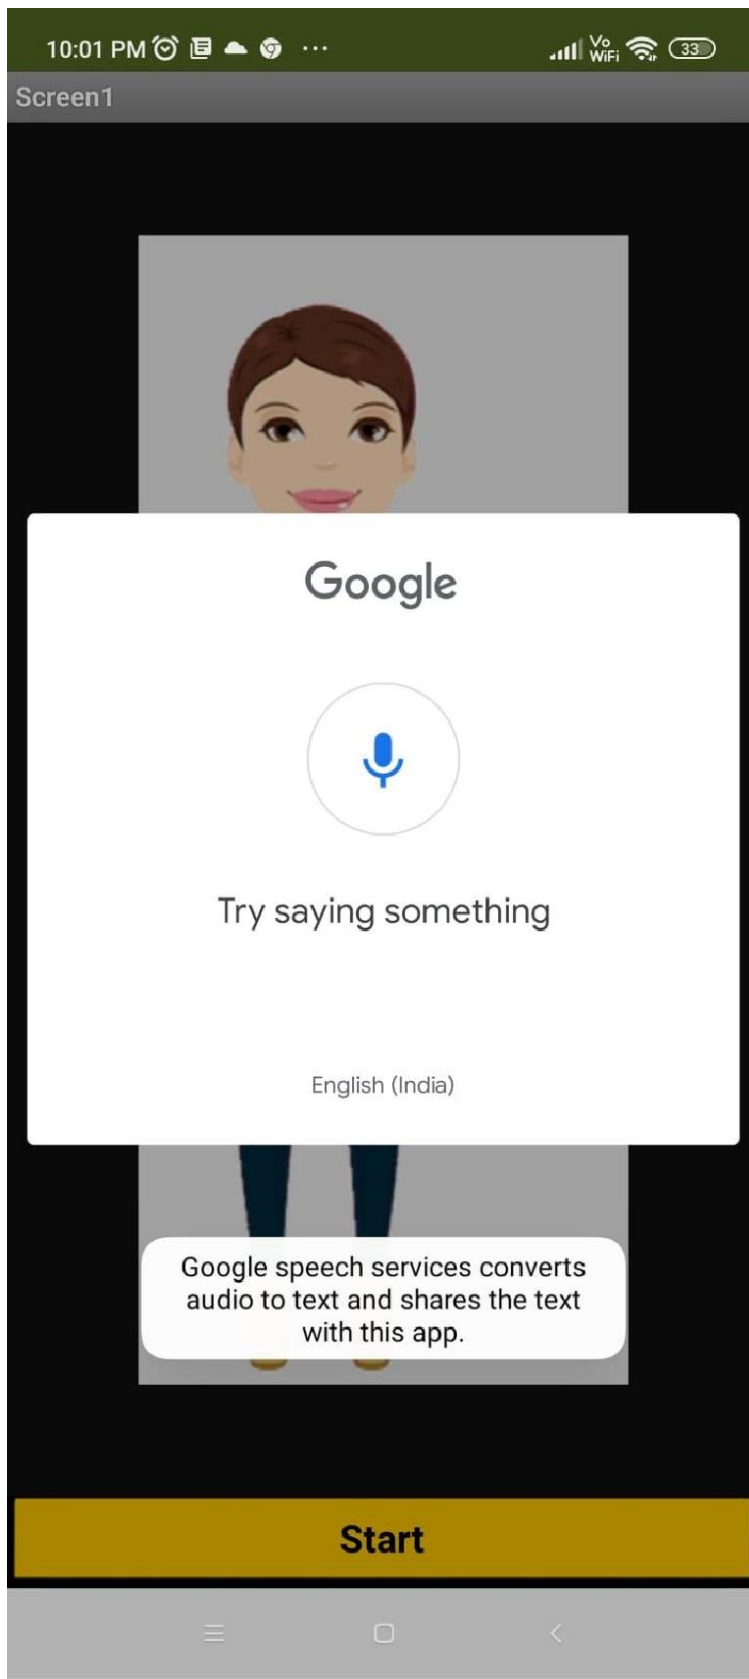

There has a saying "early to bed early to rise" it's really true. It's very important for maintain a healthy life. Always try to go to bed early and get up early. It's a great daily health tip. No doubt how important physical exercise is. For a healthy life, you must do physical exercise regularly. A thirty-minute walking is enough but it's good if you can do one hour every morning or evening. You can join your nearby physical training institute for a good guide. Cardio exercise is another daily health tip to keep healthy. Cardio exercise means cycling, running, swimming, dancing, hiking, etc. Try to do that when you can. Drink sufficient water every day is another good daily health tip. Take a minimum of eight glasses that means 2 liters per day. But it's better if you can take more than that. Every adult man has about 60% of his body is water. So you may understand how important water is. Junk foods are very harmful to human health. Though it is tasty and yummy it's not good for your health. It causes many health problems like overweight, poor nutrition, poor health. So try to avoid junk foods. If you take alcohol it's time to cut it from your life. Everybody, we know alcohol is really harmful to the human body. Taking alcohol causes many problems like brain, heart, liver problems and it's weakening your immune system. And one of the biggest bad effects is alcohol causes Cancer. Smoking is another bad habit. It's also caused many health problems like alcohol. So you must avoid smoking. Though it's not so easy try to avoid it. Increase taking fresh and green vegetables and fruits. It's very essential for daily health tips. Eat green leafy vegetables, tomatoes, sweet potatoes, berries, dark chocolate, white tea, soybeans, flaxseeds, broccoli, and cabbage. It's given you more nutrition and makes you healthy. Think positive – Take everything easy. Never do tension. Because tension can't solve anything, but it increases your healthy problem

BLOCKS:

The screenshot shows the MIT App Inventor web interface. The project is named "MedicineRemainder". The "Blocks" panel on the left lists various categories: Built-in, Control, Logic, Math, Text, Lists, Dictionaries, Colors, Variables, Procedures, Chatbot, WebViewer1, Button2, Button1, TextToSpeech1, ScSpeechRecognizer1, and PhoneCall1. The "Viewer" panel displays a logic block for "when ScSpeechRecognizer1.AfterGettingText". The logic is as follows:
- If the result is "I am good", call TextToSpeech1.Speak with the message "So...How can I help you today?".
- Else if the result is "search", call TextToSpeech1.Speak with the message "Okay, so what should I have to search on google?", then set WebViewer1.HomeUri to "https://www.google.com/search?q=", and get the result.
- Else if the result is "I am feeling sick today", call TextToSpeech1.Speak with the message "Ohh... so I should call to your family doctor?".
- Else if the result is "yes please call to my family doctor", call TextToSpeech1.Speak with the message "yes please call to my family doctor?".
The "Show Warnings" button is visible at the bottom left of the viewer.

The screenshot shows the MIT App Inventor web interface for the "MedicineRemainder" project. The "Buy_medicines" screen is selected. The "Blocks" panel on the left lists various categories: Built-in, Control, Logic, Math, Text, Lists, Dictionaries, Colors, Variables, Procedures, Buy_medicines, VerticalArrangement5, Image7, Label7, pharameasy, apollo_pharmacy, and Netmeds. The "Viewer" panel displays three logic blocks for "when" events:
- "when apollo_pharmacy.Click": set ActivityStarter1.Action to android.intent.action.VIEW, set ActivityStarter1.DataUri to "https://www.apollopharmacy.in/?variant=2&utm_sou...", and call ActivityStarter1.StartActivity.
- "when Netmeds.Click": set ActivityStarter1.Action to android.intent.action.VIEW, set ActivityStarter1.DataUri to "https://www.netmeds.com/", and call ActivityStarter1.StartActivity.
- "when Practo.Click": set ActivityStarter1.Action to android.intent.action.VIEW, set ActivityStarter1.DataUri to "https://www.practo.com/", and call ActivityStarter1.StartActivity.
The "Show Warnings" button is visible at the bottom left of the viewer.
